EDUCATION

M.Tech
AI & Machine Learning
Silver Oak University
2025 – 2027
Ahmedabad, GJ

B.E. Computer Engineering
Apollo Institute of Engg. & Tech.
Gujarat Technological University
Aug 2021 – July 2025
Ahmedabad, GJ

CPI: 7.71 CGPA: 8.43

SKILLS

FRONTEND

- React.js / Next.js 14
- TypeScript / JavaScript
- Tailwind CSS / MUI

BACKEND

- Node.js / Express.js
- REST APIs / JWT Auth
- Socket.io / MongoDB

AI & INTEGRATIONS

- Google Gemini API
- Anthropic Claude API
- Prompt Engineering
- Vibe Coding
- Razorpay / Cloudinary
- Redis (Upstash)

AI DEV TOOLS

- Cursor (AI Code Editor)
- Claude Code (CLI)
- OpenAI Codex
- Antigravity
- GitHub Copilot

TOOLS

- Git & GitHub
- Swagger / Winston
- Nodemailer / Resend

PROFILE

Fresh Computer Engineering graduate seeking my first full-time developer role. Built complete full-stack SaaS applications independently — designing **REST APIs with Node.js and Express.js**, connecting to **MongoDB**, and consuming them with **React and Next.js**. Every project has a real Express backend covering routing, JWT auth, third-party integrations, and error handling. I use AI dev tools like **Cursor, Claude Code, and Codex** to build fast without sacrificing code quality.

WORK EXPERIENCE

MERN Stack Developer Intern

Grownited Private Limited

2024 · 3 Months Ahmedabad, GJ

- Built **Health Assist**, a full-stack telemedicine platform with appointment booking, doctor dashboards, and digital EHR management using the MERN stack.
- Implemented real-time doctor–patient chat using **Socket.io** with typing indicators, read receipts, and file sharing.
- Integrated **Razorpay** for consultation payments and **Cloudinary** for secure medical document storage.
- Built role-based access control (Admin, Doctor, Patient) with JWT authentication and bcrypt password hashing.

PROJECTS BUILT FOR MYSELF

VoicePost — AI LinkedIn Ghostwriter

Next.js · TypeScript · Claude API · Razorpay

Full-stack SaaS · LinkedIn OAuth · Subscription Billing

- Voice Profile generation from past LinkedIn posts using **Anthropic Claude API**, with weekly auto-content delivery to an approval dashboard.
- Full Express backend with LinkedIn OAuth 2.0, Razorpay subscriptions, Upstash Redis rate limiting, and Resend email automation.

ReviewGenerator — GMB Review Booster

Next.js 15 · Node.js · Gemini 2.5 · MongoDB

QR-Driven SaaS · Multilingual · Analytics Dashboard

- QR-based SaaS generating multilingual review drafts (English, Hindi, Hinglish) using **Gemini 2.5 Flash** for local businesses.
- Real-time conversion funnel tracking, automated daily CSV email reports via node-cron, and Razorpay subscription billing.

PromptLab — AI Prompt Analyzer

React · Express · Gemini API · MongoDB

Full Stack · JWT Auth · Rate Limiting · Swagger Docs

- Web app to analyze and improve AI prompts using **Google Gemini**, with JWT auth, prompt history, tag filters, and pagination.
- Express backend with Swagger API docs, Winston logging, rate limiting, and Helmet.js security headers.

CERTIFICATIONS & HIGHLIGHTS

- M.Tech in Artificial Intelligence & Machine Learning — Silver Oak University (2025–2027, pursuing).
- Proficient in AI-assisted development using Cursor, Claude Code, OpenAI Codex, and Antigravity across 3 production SaaS builds.
- Built complete SaaS infrastructure independently: OAuth, subscription billing, email automation, Redis rate limiting, and AI API integration.
